

FCC,

I am a subscriber to XM satellite radio. I have made a considerable investment to enjoy commercial free music in my home and especially my car. Local radio is stale and obnoxious. Currently XM does not provide my area with traffic and weather but I would welcome it if I had the option. My metropolitan area has horrible traffic and unpredictable weather trends. Local radio stations do not inform its listeners with vital traffic information and weather conditions in a timely manner or in a format that is appealing to all listeners. In the hopes my XM will provide me with this vital information in the future please reject the NAB's petition 04-160.

James Englert
